THE INVISIBLE RISK:

Transportation is the #1 target for audit reclassification. When a driver gets hurt without specific coverage, the state looks for money in two places: your Workers' Comp or your Master Policy.

One injury to an uninsured owner-operator can trigger an audit that threatens your entire fleet's classification status. Truckers Insured creates a "Compliance Firewall," ensuring drivers have their own primary coverage so your business liability stays untouched.

Keeps 1099 injury claims separate from your business

High-limit medical coverage ensures drivers get care immediately
